To Whom It May Concern

As a member of the adjudicating team for a few years, I hereby give my full support to the continuation of the students program.

There is no such a student empowering program that I know of. This is the only one that brings students to be part of the industry leaders under one roof.

The panel might be consisting of a few adjudicators but the students present to a house full of experts and they all engage the students. This is empowerment at its best.

The program also exposes the students to meet CEO's and owners of industry. They meet other students from the continent.

They meet politician, lawyers, lenders, etc. there is no way that any student would be able to meet such calibre of people on their own. Hence this program must continue. And for it to continue, support from all spheres would be appreciated.

As for me, I pledge my support for the program to continue.
